SOMEWHERE, EARTH

Really Awesome Position

Dear XXXXXXXXXXXXXXXX

I am interested the Principal Software Engineer position at Cloud Cap. As a well-rounded full-stack software architect and mathematical modeler, I have developed mathematical systems and user applications in multiple fields. From remote sensing to watershed planning to pharmaceutical salesforce assessment. I have routinely shown the curiosity and drive to fit in multiple problem domains.

Why Me?

Because I stole someone else's \LaTeX class and used it for myself in this letter

Why XXXXXXXX?

Because if you know what \LaTeX is, you'll admit you've done the same thing.

Sincerely,

John W. Metta
